EDUCATION

Purdue University

August 2019 – May 2023

B.S. in Computer Science with a concentration in Software Engineering

West Lafayette, IN

Minor in Entrepreneurship and Innovation

WORK EXPERIENCE

Lockheed Martin

July 2023 – Present

Full Stack Engineer - Security Clearance: Secret

Fort Worth, TX

- One of a dozen approved GUI code reviewers to help enforce code quality and adherence to design principles
- Reduced technical debt through code optimization, modular design, and minimizing code duplication
- Increased test coverage to over 90% on over half a dozen services, ensuring maintainability and stability
- Translated vital Matlab algorithms into Java while improving their runtime from $O(N^2)$ to $O(N)$
- Saved dozens of hours of manual labor by developing Python and dynamic SQL scripts for automation
- Pioneered development and design of a custom full stack framework to dynamically render components based on variable database mappings, a feature essential to the completion of MVP
- Technologies used: **JavaScript, React.js, Java, SQL, Python, Spring, Jest, React Testing Library**

Socotra

June 2022 – August 2022

Frontend Engineering Intern

San Francisco, CA

- Improved central user flow for 30+ insurance companies by redesigning core elements of Socotra platform
- Designed custom scalable components for use in current & future development using material UI concepts
- Implemented functional and regression unit tests using Jest framework and mock data to ensure robustness
- Helped redesign and rebuild Socotra Administration Portal to migrate all customers off of old code base
- Technologies used: **TypeScript, React.js, Jest**

PROJECTS

Personal Website, <https://yung4.github.io>

July 2022 – Present

- A digital portfolio written in HTML, SCSS, and JavaScript using the GSAP ScrollTrigger library

Spotistics, <https://yung4.github.io/spotistics>

July 2020

- A client-sided React web application written in Javascript that analyzes a user's Spotify listening habits
- Obtains OAuth access token from the Spotify API for data access authorization
- Utilizes the ChartJS library to animate graphs to visually display statistics of user's playlists
- Accessed monthly on average by users to check their top songs and artists of the month

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, C++, C, HTML, CSS

Tools: Node.js, React.js, Git, VSCode, IntelliJ, Microsoft SQL Server, Azure SQL
